Your specialist since 1895

FOR
CUSTOMISED AND PROFITABLE
FERTILISATION

Visit

www.agera.fr

Specialising in the production of mineral and organo-mineral fertilisers and soil conditioners, focusing on B-to-B and present on the sustainable and organic agricultural and green spaces markets since 1895.

“ Our **expertise** and **skills** enable us to operate on **the French and international market.** ”

● **CUSTOM-MADE FORMULATION**

We offer custom-made fertiliser and soil conditioner formulas for products that stand out and meet market requirements.

● **QUALITY GRANULES**

Our laboratory continually controls the quality of end products and their balance. They are manufactured from a selection of the best raw materials available on the market.

● **MANUFACTURE FROM 25 TONS**

A wide range of packaging is available with the option of customising it with your company colours.

● **STORAGE FACILITY FOR END PRODUCTS**

Over 30,000 m² of storage space available. We also propose a shipment management service.

● **QUICK LOADING**

Our team and equipment enable us to load a 25-ton truck in 15 minutes (by appointment).

An experienced and competent technical team

A proactive and efficient back office that is always attentive to its customers

Formulations that comply with new fertilisation regulations

An effective, modern tool thanks to significant annual investments

Permanent control of the quality of our end products and their balance

Large storage facility for end products
